PUBLIC FEEDBACK

- The general sentiment from attendees was positive with a preference towards constructing a roundabout at the intersection of County Highway 13 (Ideal Avenue) and County Highway 6 (Stillwater Boulevard).
- There were mixed opinions regarding a raised concrete median that would separate northbound from southbound traffic.
- We heard the general desire to include walking/biking trails in this area.
- Overall, we heard the desire to make improvements to this area, while considering ways to reduce impacts to property owners and the environment.
- We heard little support from residents for the alternative that considers maintaining the existing width of the railroad crossing, which results in no trail on the east side of Ideal Avenue.
